CONTENTS

Volume 40, Issue Nos. 1–24 (1997)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Application of Wavelets on the Interval to Numerical Analysis of Integral Equations in Electromagnetic Scattering Problems: G. Wang 1

A New Formulation of Isoparametric Finite Elements and the Relationship Between Hybrid Stress Element and Incompatible Element: Z.-P. Jiao, T. H. H. Pian and S. Yong 15

Finite Element Formulations for Friction Pendulum Seismic Isolation Bearings: C. S. Tsai 29

Improved Transverse Shear Stresses in Composite Finite Elements Based on First Order Shear Deformation Theory: R. Rolfes and K. Rohwer 51

Solving Nonlinear Differential Equations of Mechanics with the Boundary Element Method and Radial Basis Functions: R. Pollandt 61

A Two-Level Decomposition Method for Shape Optimization of Structures: Wang Xicheng, D. Kennedy and F. W. Williams 75

Treatment of Body-force Volume Integrals in BEM by Exact Transformation for 2-D Anisotropic Elasticity: J. J. Zhang, C. L. Tan and F. F. Afagh 89

Hexahedral Mesh Generation by Medial Surface Subdivision: Part II. Solids with Flat and Concave Edges: M. A. Price and C. G. Armstrong 111

Recovery by Equilibrium in Patches (REP): B. Boroomand and O. C. Zienkiewicz . . . 137

Optimal Design with Discrete Variables: Some Numerical Experiments: M.-W. Huang and J. S. Arora 165

ANNOUNCEMENTS 189

CONFERENCE DIARY 192

Issue No. 2

A Finite Element Mixture Model for Hierarchical Porous Media: W. J. Vankan, J. M. Huyghe, M. R. Drost, J. D. Janssen and A. Huson 193

Beam Stiffness Matrix Based on the Elasticity Equations: U. Schramm, V. Rubenchik and W. D. Pilkey 211

A cumulative Author, Title and Subject Index is available at the Internet address
http://cajun.cs.nott.ac.uk/engineering/numeng.html

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Abstract Jnl. in Earthquake Engineering, Applied Mechanics Reviews, BHRA Fluid Engineering Centre, Boundary Elements Communications, CITIS–Civil Engineering Abstracts, Compumath Citation (ISI), (CC)/Eng, Tech and Applied Sciences, Engineering Index Inc, Eng. Societies Library, Fluid Abstracts and FLUIDEX, Geodex, Geotechnical Abstracts, Indian Society of Earthquake Technology, INSPEC, Int. Petroleum Abstracts, Materials Information, Mathematical Reviews, Mechanics, Newsletter of Engineering Analysis Software, PASCAL, Research Alert (ISI), Science Citation Index (ISI), SCISEARCH Database (ISI), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik.

Exact Dynamic Stiffness Matrix for Beams of Arbitrarily Varying Cross Sections: Y. Mou, R. P. S. Han and A. H. Shah 233

Unstructured Grid Generation and a Simple Triangulation Algorithm for Arbitrary 2-D Geometries using Object Oriented Programming: B. K. Karamete, T. Tokdemir and M. Ger 251

A Finite Element Perturbation Method for Computing Fluid-induced Forces on a Centrifugal Impeller Rotating and Whirling in a Volute Casing: J. B. Jonker and T. G. van Essen 269

Free Vibration Analysis of Kirchhoff Plates Resting on Elastic Foundation by Mixed Finite Element Formulation Based on Gâteaux Differential: M. H. Omurtag, A. Özütok, A. Y. Aköz and Y. Özçelikörs 295

Stability Analysis and Design of Time-stepping Schemes for General Elastodynamic Boundary Element Models: A. Peirce and E. Siebrits 319

Numerical Grid Generation of an Irregular Region: T.-K. Tsay and F.-S. Hsu 343

Three-dimensional Gears Modeling in Multibody Systems Analysis: A. Cardona . . . 357

ANNOUNCEMENTS 383

CONFERENCE DIARY 386

Issue No. 3

Numerical Solutions of Linear Mixed Boundary Value Problems Using Stochastic Representations: J.-P. Morillon 387

Improved Enhanced Strain Four-node Element with Taylor Expansion of the Shape Functions: J. Korelc and P. Wriggers 407

Equilibrium Based Iterative Solutions for the Non-linear Beam Problem: M. Petrangeli and V. Ciampi 423

Sparse Matrix Methods for Use in Electrical Impedance Tomography: P. A. T. Pinheiro and F. J. Dickin 439

Multilevel Aggregation Method for Solving Large-scale Generalized Eigenvalue Problems in Structural Dynamics: V. E. Bulgakov, M. V. Belyi and K. M. Mathisen . 453

A Unified Timoshenko Beam B-spline Rayleigh–Ritz Method for Vibration and Buckling Analysis of Thick and Thin Beams and Plates: S. Wang 473

Numerical Modelling of Twin-roll Casting by the Coupled Fluid Flow and Heat Transfer Model: J. G. Chang and C.-I. Weng 493

A Numerical Method for Dynamic Analysis of Vehicles Moving on Flexible Structures Having Gaps: K. Lee 511

Development and Application of an Integrated Multidisciplinary Analysis Capability: K. K. Gupta 533

Simultaneous Optimization of Shape and Flow Parameters for Combined Free and Forced Convection in Vertical Channels: R. A. Meric 551

Efficient Generation of Oriented Meshes for Solving Convection–diffusion Problems: N. Madden and M. Stynes 565

ANNOUNCEMENTS 577

CONFERENCE DIARY 580

Issue No. 4

Using Longest-side Bisection Techniques for the Automatic Refinement of Delaunay Triangulations: M.-C. Rivara and P. Inostroza 581

Elasto-plastic Interface Model for 3D-frictional Orthotropic Contact Problems: R. Buczkowski and M. Kleiber 599

A Three-dimensional Finite-volume/Newton Method for Thermal-capillary Problems: C. W. Lan and M. C. Liang 621

Three-dimensional Design Sensitivity Analysis Using a Boundary Integral Approach: Z. Erman and R. T. Fenner 637

Crashworthiness Analysis and Design Using Rigid–flexible Multibody Dynamics with Application to Train Vehicles: M. S. Pereira, J. A. C. Ambrósio and J. P. Dias . . . 655

On Large Deformations of Thin Elasto-plastic Shells: Implementation of a Finite Rotation Model for Quadrilateral Shell Element: B. Brank, D. Perić and F. B. Damjanić 689

The Partition of Unity Method: I. Babuška and J. M. Melenk 727

Static Analysis of Frame Structures by the Differential Quadrature Element Method: X. Wang and H. Gu 759

ANNOUNCEMENTS 773

CONFERENCE DIARY 775

Issue No. 5

An Eigen-force Method for Finite Element Analysis and Reanalysis: C. G. Koh, K. K. Ang and R. Xu 777

The Boundary Node Method for Potential Problems: Y. X. Mukherjee and S. Mukherjee 797

Finite Element Modelling of Structures Including Piezoelectric Active Devices: J. Kim, V. V. Varadan and V. K. Varadan 817

Mode Jumping and Attractive Paths in Multimode Elastic Buckling: G. Salerno and R. Casciaro 833

Design of Energy Conserving Algorithms for Frictionless Dynamic Contact Problems: T. A. Laursen and V. Chawla 863

An Adaptive Agglomeration Method for Additive Correction Multigrid: S. R. Elias, G. D. Stubley and G. D. Raithby 887

A Finite Element Technique to Simulate the Stable Shape Evolution of Planar Cracks with an Application to a Semi-elliptical Surface Crack in a Bimaterial Finite Solid: R. Galdos 905

Algorithmic Aspects of Adaptive Multigrid Finite Element Analysis: S. Lopez and R. Casciaro 919

Quadratic Triangular C^0 Plate Bending Element: K. Y. Sze, D. Zhu and D.-P. Chen . . 937

Infinite Domain Correction for Anti-plane Shear Waves in a Two-dimensional Boundary Element Analysis: E. Heymsfield 953

ANNOUNCEMENTS 965

CONFERENCE DIARY 967

Issue No. 6

Classical Solution Shape Functions in the Finite Element Analysis of Circular and Annular Plates: A. A. Lakis and A. Selmane 969

An Efficient Stress Algorithm with Applications in Viscoplasticity and Plasticity: S. Hartmann. G Lührs and P. Haupt 991

Comparison of Sensitivity Equation and Adjoint Equation Methods for Parameter Identification Problems: A. Anju and M. Kawahara 1015

Evaluation of Automatic Domain Partitioning Algorithms for Parallel Finite Element Analysis: S.-H. Hsieh, G. H. Paulino and J. F. Abel 1025

Generating Optimal Configurations in Structural Design Using Simulated Annealing: P. Y. Shim and S. Manoochehri 1053

Inelastic Constitutive Parameter Identification Using an Evolutionary Algorithm with Continuous Individuals: T. Furukawa and G. Yagawa 1071

Singular *p*-version Finite Elements for Stress Intensity Factor Computations: P. Rahulkumar, S. Saigal and S. Yunus 1091

Influence of Geometric Non-linearities on the Free Vibrations of Orthotropic Open Cylindrical Shells: A. Selmane and A. A. Lakis 1115

A Superconvergent Stress Recovery Technique with Equilibrium Constraint: T. Lee, H. C. Park and S. W. Lee 1139

ANNOUNCEMENTS 1161

CONFERENCE DIARY 1163

Issue No. 7

Complex Variable Boundary Element Method for Torsion of Composite Shafts: M. Shams-Ahmadi and S. I. Chou 1165

A Numerical Scheme for Mode III Dynamic Fracture Problems: J. W. Morrissey and P. H. Geubelle 1181

Generalized Laminate Theories Based on Double Superposition Hypothesis: X. Li and D. Liu 1197

Preform Die Shape Design in Metal Forming Using an Optimization Method: G. Zhao, E. Wright and R. V. Grandhi 1213

Moving Boundary Computation of the Float-zone Process: M. M. Rao and W. Shyy . 1231

Formulation of Geometrically Non-linear Problems in the Spatial Reference Frame: A. T. Noël and B. A. Szabó 1263

Application of the Ordinary Least-squares Approach for Solution of Complex Variable Boundary Element Problems: G.-Q. Yu and T. C. Rasmussen 1281

Topology Optimization of Sheets in Contact by a Subgradient Method: J. Petersson and M. Patriksson 1295

Improvements of Simple Genetic Algorithm in Structural Design: T.-Y. Chen and C.-J. Chen 1323

Finite Element Stress Extraction by the Complementary Energy Principle: Z. Yosibash 1335

ANNOUNCEMENTS 1355

CONFERENCE DIARY 1357

Issue No. 8

A Three-dimensional Analysis of the Spheroidal and Toroidal Elastic Vibrations of Thick-walled Spherical Bodies of Revolution: O. G. McGee and S. C. Spry 1359

An Adaptive Successive Over Relaxation Domain Decomposition by the Boundary Spectral Strip Method: J. Avrashi, O. Michael and G. Rosenhouse 1383

Studies of Stress Concentration by Using Special Hybrid Stress Elements: Z. Tian, J. Liu, L. Ye and T. H. H. Pian 1399

Extension of the Zienkiewicz-Zhu Error Estimator to Shape Sensitivity Analysis: F. J. Fuenmayor, J. L. Oliver and J. J. Ródenas 1413

Finite Element Solution of Incompressible Fluid–structure Vibration Problems: A. Bermúdez, R. Durán and R. Rodríguez 1435

Finite Element Remeshing: A Metal Forming Approach for Quadrilateral Mesh Generation and Refinement: S. B. Petersen and P. A. F. Martins 1449

Exploiting Design Length Scales in Structural Optimization: J. Zhang and W. J. Anderson 1465

Enriched Element-free Galerkin Methods for Crack Tip Fields: M. Fleming, Y. A. Chu, B. Moran and T. Belytschko 1483

A Procedure for the Optimal Synthesis of Planar Mechanisms Based on Non-linear Position Problems: R. Avilés, M. B. Goizalde Ajuria, J. Vallejo and A. Hernández . . 1505

Finite Element Solution of a Model Free Surface Problem by the Optimal Shape Design Approach: G. Mejak 1525

ANNOUNCEMENTS 1551

CONFERENCE DIARY 1553

Issue No. 9

The Time-domain DBEM for Rapidly Growing Cracks: P. Fedelinski, M. H. Aliabadi and D. P. Rooke 1555

A General Topology-based Mesh Data Structure: M. W. Beall and M. S. Shephard . . 1573

An Indirect Boundary Element Method for Plate Bending Analysis: E. S. Ventsel . . . 1597

Boundary Element Analysis of Stress Concentration in Micropolar Elastic Plate: F.-Y. Huang and K.-Z. Liang 1611

A Third-order Numerical Scheme with Upwind Weighting for Solving the Solute Transport Equation: K. Huang, J. Šimůnek and M. Th. van Genuchten 1623

Near Field Transient Axisymmetric Waves in Layered Structures: Effects of Weak Coupling: C. Cetinkaya, J. Brown, A. A. F. Mohammed and A. F. Vakakis 1639

Tree–Cotree Decompositions for First-order Complete Tangential Vector Finite Elements: J. B. Manges and Z. J. Cendes 1667

Infinite Domain Correction for In-plane Body Waves in a Two-dimensional Boundary Element Analysis: E. Heymsfield 1687

Least-squares Solutions of a General Numerical Method for Arbitrary Irregular Grids: R. S. Baty and W. P. Wolfe 1701

Shape Design Sensitivity Analysis and Optimization for Structural Durability: K.-H. Chang, X. Yu and K. K. Choi 1719

ANNOUNCEMENTS 1745

CONFERENCE DIARY 1747

Issue No. 10

Calculation of Shallow Shell Subject to Influence of Load Local Effect by the Difference Technique on Irregular Networks: D. C. Tran 1749

Adaptive Solver for the *p*-version of Finite Element Method: J. Fish and R. Guttal . . 1767

A Hybrid Stress Quadrilateral Shell Element with Full Rotational D.O.F.s: K. Y. Sze, Y. S. Sim and A. K. Soh 1785

Static and Dynamic Applications of a Five Noded Horizontally Curved Beam Element with Shear Deformation: D. Sengupta and S. Dasgupta 1801

A Fully Coupled, Implicit, Numerical Scheme for Laminar and Turbulent Parabolic Flows: R. Villasenor 1821

An Explicit Hybrid-stabilized Eighteen-node Solid Element for Thin Shell Analysis: K. Y. Sze, S. Yi and M. H. Tay 1839

Finite Element Algorithms for Dynamic Simulations of Viscoelastic Composite Shell Structures using Conjugated Gradient Method on Coarse Grained and Massively Parallel Machines: S. Yi, M. Fouad Ahmad and H. H. Hilton 1857

Continuity and Collocation Effects in the Boundary Element Method: B. A. Ammons and M. Vable 1877

Benchmark Solutions of Some Structural Analysis Problems using Finite-volume Method and Multigrid Acceleration: I. Demirdžić, S. Muzaferija and M. Perić 1893

An Upper Bound Finite Element Procedure for Solving Large Plane Strain Deformation: C.-L. Hwan 1909

Recursive Multidimensional Integration: W. M. Pieper 1923

ANNOUNCEMENTS 1937

CONFERENCE DIARY 1939

Issue No. 11

A New Approach to the Differential Quadrature Method for Fourth-order Equations: W. Chen, A. G. Striz and C. W. Bert 1941

Aspects of 2-D Delaunay Mesh Generation: H. Borouchaki and P. L. George 1957

New Numerical Integration Schemes for Applications of Galerkin BEM to 2-D Problems: A. Aimi, M. Diligenti and G. Monegato 1977

Displacement/Pressure Based Mixed Finite Element Formulations for Acoustic Fluid–structure Interaction Problems: X. Wang and K. J. Bathe 2001

A Perturbation Method for Reduction of Eigenvalue Analysis of Structures with Large Stiffnesses and Small Masses: X. Liu 2019

On the Convergence of Zero-finding Eigensolution Algorithms for Solving Non-linear Eigenvalue Problems: M. R. Abdel-Aziz 2037

On the Selection of a Locking-free *hp* Element for Elasticity Problems: L. Chilton and M. Suri 2045

A Finite Element Formulation of the Rigid–plastic Limit Analysis Problem: A. Capsoni and L. Corradi 2063

C^2-continuous Elements for Boundary Element Analysis: P. R. Johnston 2087

Robust Preconditioners for Linear Elasticity FEM Analyses: I. Hladík, M. B. Reed and G. Swoboda 2109

ANNOUNCEMENTS 2129

CONFERENCE DIARY 2131

Issue No. 12

Asynchronous Parallel Computing of Structural Non-stationary Random Seismic Responses: J. Lin, X. Wang and F. W. Williams 2133

Dynamic Animation of Stress Modes via the Integrated Force Method of Structural Analysis: S. N. Patnaik, R. M. Coroneos and D. A. Hopkins 2151

Free Vibration Analysis of a Rectangular Plate Carrying Any Number of Point Masses and Translational Springs by Using the Modified and Quasi-analytical and Numerical Combined Methods: J.-S. Wu and S.-S. Luo 2171

Automatic Adaptive 3-D Finite Element Refinement Using Different-order Tetrahedral Elements: C. K. Lee and S. H. Lo 2195

Iterative Solution of Large Three-dimensional BEM Elastostatic Analyses Using the GMRES Technique: C. Y. Leung and S. P. Walker 2227

Finite Element Modelling of Spatially Chaotic Structures: G. W. Hunt, R. Lawther and P. Providência e Costa 2237

A Cascade Optimization Strategy for Solution of Difficult Design Problems: S. N. Patnaik, R. M. Coroneos and D. A. Hopkins 2257

A Three-dimensional Finite Element Formulation for Thermoviscoelastic Orthotropic Media: M. A. Zocher, S. E. Groves and D. H. Allen 2267

Lie Transforms for Ordinary Differential Equations: Taking Advantage of the Hamiltonian Form of Terms of the Perturbation: R. Barrio and J. Palacián 2289

On Stress Singularities Induced by the Discretization in Curved Receding Contact Surfaces: A BEM Analysis: J. C. del Caño and F. Paris 2301

ANNOUNCEMENTS 2321

CONFERENCE DIARY 2323

Issue No. 13

Stress Points for Tension Instability in SPH: C. T. Dyka, P. W. Randles and R. P. Ingel 2325

p-adaptivity in the Time Domain Using Mv_{pq} Multivalue Time-marching Integrators: J. S. Campbell and J. C. Robinson 2343

Post-collapse Bifurcation Analysis of Shells of Revolution by the Accumulated Arc-length Method: J. G. Teng and Y. F. Lou 2369

On the Use of FFT Algorithm for the Circumferential Co-ordinate in Boundary Element Formulation of Axisymmetric Problems: G. Ozkan and Y. Mengi 2385

Aeroelastic Computations in the Time Domain Using Unstructured Meshes: K. Willcox and J. Peraire 2413

Solution of Large Linear Systems on Pipelined SIMD Machines: N. Geers and R. Klees 2433

Fitting of Tabu Search to Optimize Functions of Continuous Variables: P. Siarry and G. Berthiau 2449

Combination of Adaptivity and Mesh Smoothing for the Finite Element Analysis of Shells with Intersections: J. Riccius, K. Schweizerhof and M. Baumann . 2459

Exact Modal Synthesis Techniques Using Residual Constraint Modes: J.-B. Qiu, Z.-G. Ying and F. W. Williams 2475

On Open Boundaries in the Finite Element Approximation of Two-dimensional Advection–diffusion Flows: F. Padilla, Y. Secretan and M. Leclerc 2493

ANNOUNCEMENTS 2517

CONFERENCE DIARY 2519

Issue No. 14

A Model Study of the Quality of *a Posteriori* Error Estimators for Finite Element Solutions of Linear Elliptic Problems, with Particular Reference to the Behavior Near the Boundary: I. Babuška, T. Strouboulis and C. S. Upadhyay 2521

A New Finite Element Formulation for Planar Elastic Deformation: Z. Ye 2579

Domain Decomposition with BEM and FEM: E. Schnack and K. Türke 2593

On Boundary Elements for Simulation of Cathodic Protection Systems with Dynamic Polarization Curves: J. A. F. Santiago and J. C. F. Telles 2611

An Efficient Curved Beam Finite Element: P. Litewka and J. Rakowski 2629

Parallel Finite Element Laplace Transform Method for the Non-equilibrium Groundwater Transport Equation: G. Pini and M. Putti 2653

Multiobjective Design of a Marine Vehicle with Aid of Design Knowledge: D. Lee . . 2665

A Space–Time Finite Element Model to Study the Influence of Interfacial Kinetics and Diffusion on Crystallization Kinetics: K. M. Kit and J. M. Schultz 2679

Enrichment of Finite Elements with Numerical Solutions for Singular Stress Fields: S. S. Pageau and S. B. Biggers, Jr 2693

CONFERENCE DIARY 2715

Issue No. 15

An Algebraically Partitioned FETI Method for Parallel Structural Analysis: Algorithm Description: K. C. Park, M. R. Justino, Jr and C. A. Felippa 2717

An Algebraically Partitioned FETI Method for Parallel Structural Analysis: Performance Evaluation: M. R. Justino, Jr, K. C. Park and C. A. Felippa 2739

A Reduced SAND Method for Optimal Design of Non-linear Structures: C. E. Orozco and O. N. Ghattas 2759

Three-dimensional Absolute Nodal Co-ordinate Formulation: Plate Problem: A. A. Shabana and A. P. Christensen 2775

Finite Element Formulations for Exterior Problems: Application to Hybrid Methods, Non-reflecting Boundary Conditions, and Infinite Elements: I. Harari, P. E. Barbone and J. M. Montgomery 2791

Spline Approximation of Thin Shell Dynamics: R. C. H. del Rosario and R. C. Smith . 2807

Analysis and Implementation of a New Constant Acceleration Subcycling Algorithm: W. J. T. Daniel 2841

Dislocation and Point-Force-Based Approach to the Special Green's Function BEM for Elliptic Hole and Crack Problems in Two Dimensions: M. Denda and I. Kosaka . . . 2857

Finite Element Analysis of Solidification Using Object-oriented and Parallel Techniques: I. Masters, A. S. Usmani, J. T. Cross and R. W. Lewis 2891

CONFERENCE DIARY 2911

Issue No. 16

A Symmetric Galerkin Multi-zone Boundary Element Formulation: J. B. Layton, S. Ganguly, C. Balakrishna and J. H. Kane 2913

New Stress Assumption for Hybrid Stress Elements and Refined Four-node Plane and Eight-node Brick Elements: S. T. Yeo and B. C. Lee 2933

An Improved Element Free Galerkin Formulation: I. Kaljević and S. Saigal 2953

Updated Lagrangian Formulation of Contact Problems Using Variational Inequalities: M. H. Refaat and S. A. Meguid 2975

Dual Boundary Element Analysis of Closed Cracks: J. Tuhkuri 2995

The Patch Test Conditions and Some Multivariable Finite Element Formulations: W. Zhang and D. P. Chen 3015

Voigt–Reuss Topology Optimization for Structures with Linear Elastic Material Behaviours: C. C. Swan and I. Kosaka 3033

Numerical Algorithms and Mesh Dependence in the Disturbed State Concept: C. S. Desai, C. Basaran and W. Zhang 3059

Symmetric Galerkin Boundary Integral Formulation for Interface and Multi-zone Problems: L. J. Gray and G. H. Paulino 3085

CONFERENCE DIARY 3103

Issue No. 17

A Genetic Algorithm for Sequencing Type Problems in Engineering Design: M.-W. Huang, C. C. Hsieh and J. S. Arora 3105

Reduced Minimization of Product and Non-product Type in Mindlin Plate Elements: Kim Yong-Woo 3117

Improved Numerical Method for the Traction Boundary Integral Equation by Application of Stokes' Theorem: A. Young 3141

A Cycle-oriented Incremental Analysis of Shakedown Problems: S. Pycko 3163

An Adaptive *hp*-version of the Finite Element Method Applied to Flame Propagation Problems: V. C. V. Rao, P. C. Das and T. Sundararajan 3181

Finite Element Analysis of the Superplastic Forming of Thick Sheet Using the Incremental Flow Formulation: J. Bonet, P. Bhargava and R. D. Wood 3205

Modelling of Progressive Short Waves Using Wave Envelopes: E. Chadwick and P. Bettess 3229

An Improved REP Recovery and the Effectivity Robustness Test: B. Boroomand and O. C. Zienkiewicz 3247

A Block Solver for Large, Unsymmetric, Sparse, Banded Matrices with Symmetric Profiles: K. G. Manoj and S. K. Bhattacharyya 3279

CONFERENCE DIARY 3297

Issue No. 18

On Consistent Discretization of Inertia Terms for C^0 Structural Elements with Modified Stiffness Matrices: H. K. Stolarski and J. F. D'Costa 3299

New Longest-edge Algorithms for the Refinement and/or Improvement of Unstructured Triangulations: M.-C. Rivara 3313

On Non-linear Transformations for the Integration of Weakly-singular and Cauchy Principal Value Integrals: M. Doblaré and L. Gracia 3325

A Formulation of Arbitrarily Shaped Surface Elements for Three-dimensional Large Deformation Contact with Friction: H. Parisch and Ch. Lübbing 3359

Combined Finite Element–Normal Mode Expansion Methods in Electroelasticity and Their Application to Piezoactive Motors: R. Le Letty, F. Claeyssen, N. Lhermet, B. Hamonic, J. N. Decarpigny and R. Bossut 3385

Comparative Study of Finite Element Formulations for the Semiconductor Drift-diffusion Equations: J. T. Trattles and C. M. Johnson 3405

A Coupled Heat–Moisture Transfer Theory for Deformable Unsaturated Soil and its Algorithmic Implementation: H. R. Thomas and Y. He 3421

A Posteriori Error Estimation for Finite Element Solutions of Helmholtz' Equation. Part I: The Quality of Local Indicators and Estimators: I. Babuška, F. Ihlenburg, T. Strouboulis and S. K. Gangaraj 3443

A Control Volume Finite Element Numerical Solution of Creep Problems: W. J. Ferguson 3463

A Parallel-supercomputing Investigation of the Stiffness of Aligned, Short-fibre-reinforced Composites using the Boundary Element Method: M. S. Ingber and T. D. Papathanasiou 3477

CONFERENCE DIARY 3493

Issue No. 19

A General Approximate Technique for the Finite Element Shakedown and Limit Analysis of Axisymmetrical Shells. Part 1: Theory and Fundamental Relations: J. R. Q. Franco and A. R. S. Ponter 3495

A General Approximate Technique for the Finite Element Shakedown and Limit Analysis of Axisymmetrical Shells. Part 2: Numerical Applications: J. R. Q. Franco and A. R. S. Ponter 3515

A Reformulated Arnoldi Algorithm for Non-classically Damped Eigenvalue Problems: G. Ren and Z. Zheng 3537

Inner Product Computations Using Periodized Daubechies Wavelets: J. M. Restrepo and G. K. Leaf 3557

A Comparative Study of Domain Embedding Methods for Regularized Solutions of Inverse Stefan Problems: J. Liu and B. Guerrier 3579

Automatic Adaptive Refinement for Shell Analysis using Nine-node Assumed Strain Element: C. K. Lee and R. E. Hobbs 3601

On Evaluating the Inf-sup Condition for Plate Bending Elements: A. Iosilevich, K. J. Bathe and F. Brezzi 3639

The Inside–Outside Contact Search Algorithm for Finite Element Analysis: S. P. Wang and E. Nakamachi 3665

CONFERENCE DIARY 3687

Issue No. 20

A Chebyshev Collocation Multidomain Method to Solve the Reissner–Mindlin Equations for the Transient Response of an Anisotropic Plate Subjected to Impact: B. Kjellmert 3689

An Error Calculation Method for Finite Element Analysis in Large Displacements: P. Bussy and Y. Mosbah 3703

A Parametric Study of Wave Barriers for Reduction of Train-induced Vibrations: Y.-B. Yang and H.-H. Hung 3729

Numerical Methods for Analyzing the Effects of Uncertainties on the Dynamics of Periodic Structures: P. D. Cha and L. G. de Pillis 3749

Stabilizing the Retarded Potential Method for Transient Fluid–structure Interaction Problems: C. T. Dyka, R. P. Ingel and G. C. Kirby 3767

Voigt–Reuss Topology Optimization for Structures with Nonlinear Material Behaviors: C. C. Swan and I. Kosaka 3785

Improved Vector FEM Solutions of Maxwell's Equations using Grid Pre-conditioning: D. White and G. Rodrigue 3815

Viscoplasticity for Instabilities due to Strain Softening and Strain-rate Softening: W. M. Wang, L. J. Sluys and R. de Borst 3839

Minimum Time-step Size for Diffusion Problem in FEM Analysis: H. R. Thomas and Z. Zhou 3865

CONFERENCE DIARY 3881

Issue No. 21

A Posteriori Error Estimation for Finite Element Solutions of Helmholtz' Equation—Part II: Estimation of the Pollution Error: I. Babuška, F. Ihlenburg, T. Strouboulis and S. K. Gangaraj 3883

Infinite Boundary Elements for the Dynamic Analysis of Machine Foundations: S. Bu 3901

Refined Non-conforming Quadrilateral Thin Plate Bending Element: C. Wanji and Y. K. Cheung 3919

Refined Quadrilateral Discrete Kirchhoff Thin Plate Bending Element: C. Wanji and Y. K. Cheung 3937

A New Three-dimensional Finite Element Model for the Simulation of Powder Forging Processes: Application to Hot Forming of P/M Connecting Rod: A. G. K. Jinka, M. Bellet and L. Fourment 3955

Tetrahedral Mesh Improvement Using Swapping and Smoothing: L. A. Freitag and C. Ollivier-Gooch 3979

Residual-free Bubbles for the Helmholtz Equation: L. P. Franca, C. Farhat, A. P. Macedo and M. Lesoinne 4003

An Approach to Limit Analysis with Cone-shaped Yield Surfaces: I. D. S. Pontes Fo, L. A. Borges, N. Zouain and F. R. Lopes 4011

A Plane Stress Softening Plasticity Model for Orthotropic Materials: P. B. Lourenço, R. de Borst and J. G. Rots 4033

Quadrilateral Finite-element Generation and Mesh Quality Control for Metal Forming Simulation: M. S. Joun and M. C. Lee 4059

CONFERENCE DIARY 4077

Issue No. 22

Prediction of Wrinkle Tendencies in Explicit Sheet Metal-forming Simulations: P. Nordlund and B. Häggblad 4079

Object-oriented Implementation of a Graph-theoretic Formulation for Planar Multibody Dynamics: O. M. Oshinowo and J. J. McPhee 4097

Anisotropic Mesh Optimization and its Application in Adaptivity: G. C. Buscaglia and E. A. Dari 4119

Numerical Modelling of Localized Fracture of Inelastic Solids in Dynamic Loading Processes: T. Łodygowski and P. Perzyna 4137

A Three-dimensional Least-squares Finite Element Technique for Deformation Analysis: A. H. P. Siu and Y. K. Lee 4159

Tuned Test Problems for Numerical Methods in Engineering: G. B. Sinclair, M. Anaya-Dufresne, G. Meda and M. Okajima 4183

Efficient Direct Computation of the Pseudo-inverse and its Gradient: J. B. Layton . . 4211

Finite Element Analysis of Free Edge Stresses in Non-linear Viscoelastic Composites Under Uniaxial Extension, Bending and Twisting Loadings: S. Yi 4225

Application of the Patch Test to Incompatible Laminated Finite Elements: D. C. Winkler and M. L. Accorsi 4239

Mass Matrices by Minimization of Modal Errors: P.-A. Hansson and G. Sandberg . . 4259

CONFERENCE DIARY 4273

Issue No. 23

A Finite Element Formulation of Thermomechanical Rate-dependent Frictional Sliding: V. G. Oancea and T. A. Laursen 4275

Classification of Stress Modes in Assumed Stress Fields of Hybrid Finite Elements: W. Feng, S. V. Hoa and Q. Huang 4313

Generalized Aggregation Multilevel Solver: J. Fish and V. Belsky 4341

Two Stress Update Algorithms for Large Strains: Accuracy Analysis and Numerical Implementation: A. Rodríguez-Ferran, P. Pegon and A. Huerta 4363

C*-convergence in the Finite Element Method: B. Bigdeli and D. W. Kelly 4405

Shear Deformable Shell Elements for Large Strains and Rotations: M. Bischoff and E. Ramm 4427

Damage Identification in Framed Structures using Natural Frequencies: N. Bicanic and H.-P. Chen 4451

CONFERENCE DIARY 4469

Issue No. 24

OBITUARY 4471

A Higher-order Facet Quadrilateral Composite Shell Element: T. Kant and R. K. Khare 4477

A Precise Time-step Integration Method by Step-response and Impulsive-response Matrices for Dynamic Problems: T. C. Fung 4501

A Geometrical Non-linear Brick Element Based on the EAS-method: S. Klinkel and W. Wagner 4529

On Using Different Finite Elements with an Automatic Adaptive Refinement Procedure for the Solution of 2-D Stress Analysis Problems: C. K. Lee and R. E. Hobbs 4547

Issues in Convergence Improvement for Non-linear Finite Element Programs: S. K. Esche, G. L. Kinzel and T. Altan 4577

Almost Regular Delaunay-triangulations: A. Fuchs 4595

Numerical Analysis of Edge Singularities in Three-dimensional Elasticity: Z. Yosibash 4611

CONFERENCE DIARY 4633
